Professional Summary

Dynamic PHP Full Stack Developer with strong skills in JavaScript, MySQL, and RESTful API design. Proven ability to enhance user engagement through optimized applications.

Skills

PHP development	Laravel framework	MySQL management
RESTful API design	JavaScript programming	React.js programming
Software applications	GitHub collaboration	Team collaboration

Projects

QueueSmart – Digital Queue Management System

QueueSmart is a full-stack digital queue management system designed to help service-based businesses manage customer queues efficiently using real-time updates.

- Designed and developed a scalable Queue Management System using React and Node.js (Express)
- Implemented real-time queue updates using Socket.IO for instant synchronization between customers and businesses
- Built separate customer and business flows with QR-based queue booking and live status tracking
- Developed a business dashboard for queue control, service management, analytics, and reviews
- Implemented OTP-based authentication using JWT for secure access
- Designed RESTful APIs for queue operations, business management, analytics, and notifications
- Integrated MySQL database with normalized schema and migrations
- Implemented PWA features including offline support, push notifications, and installable web app
- Designed responsive UI with animations using Framer Motion
- Created complete technical documentation covering architecture, APIs, database schema, and deployment

Luniq Health – Digital Healthcare Platform

- Developed two integrated mobile applications: Luniq Care Card (patient membership app) and Luniq Clinic (provider management app)
- Implemented healthcare membership management, digital care cards, appointment booking, patient records, clinic operations, and claim processing
- Integrated secure payments, authentication, medical document management, and real-time appointment tracking
- Built clinic administration features including doctor scheduling, patient visit management, and healthcare claims workflows
- Technologies: Flutter, Dart, REST APIs, Firebase, Payment Gateway Integration, Healthcare Management Systems

Entrar Learning Management System (LMS) & School ERP Platform Full Stack Developer | Entrar Solutions

Working as a Full Stack Developer in the development and enhancement of Entrar, a comprehensive Learning Management System (LMS) and School ERP platform serving educational institutions. Responsible for designing, developing, and maintaining web applications, RESTful APIs, mobile application APIs, payment integrations, and enterprise-level school management modules.

Key Responsibilities & Achievements:

- Developed and maintained scalable RESTful APIs for web and mobile applications
- Built dynamic admission, registration, event, and activity forms with secure payment gateway integrations
- Designed and developed student management modules including admissions, attendance, academics, examinations, report cards,

and communication systems

- Implemented cafeteria (Cafe) management solutions covering ordering, billing, wallet management, and transaction tracking
- Developed infirmary/health management modules for student medical records, health tracking, and clinic administration
- Created automated report card generation systems with customizable grading structures, performance analytics, and PDF exports
- Developed fee management and online payment modules supporting multiple payment methods and transaction reconciliation
- Optimized database performance and complex reporting systems for large volumes of student and financial data
- Collaborated with cross-functional teams to deliver new features, improve system performance, and enhance user experience
- Maintained secure authentication, authorization, and role-based access control across multiple modules
- Integrated third-party services including payment gateways, SMS, email notifications, barcode generation, and document management systems

Key Modules Developed:

- Admissions & Enrollment Management
- Student Information System (SIS)
- Learning Management System (LMS)
- Examination & Report Card Management
- Fee & Payment Management
- Event & Registration Management
- Cafeteria Management
- Infirmary & Health Records
- Parent-Teacher Communication
- Mobile Application APIs
- Analytics & Reporting Dashboards

Technologies Used: PHP, MySQL, JavaScript, jQuery, HTML5, CSS3, Bootstrap, REST APIs, JSON, Git, Payment Gateway Integration, PDF Generation, Barcode Systems, Mobile API Development.

Work History

PHP Full Stack Developer, 12/2023 - Current

Entrar – Bengaluru, India

- Developed dynamic web applications using PHP, JavaScript, and MySQL, enhancing user engagement.
- Collaborated with cross-functional teams to implement Agile methodologies, streamlining project delivery.
- Designed and maintained RESTful APIs to facilitate seamless data exchange between front-end and back-end systems.
- Optimized application performance through code reviews and debugging, reducing load time and improving user experience.
- Integrated front-end frameworks such as Vue.js to create responsive and interactive user interfaces.
- Assisted in database design and management, ensuring data integrity and security across applications.

Full Stack Developer, 05/2026 - 06/2026

Luniq – Bengaluru (Remote)

- Developed and maintained responsive web applications using JavaScript, React, and Node.js, enhancing user experience.
- Collaborated with cross-functional teams to design and implement RESTful APIs, streamlining data access and integration.
- Designed and implemented scalable applications for data extraction and analysis.
- Proved successful working within tight deadlines and a fast-paced environment.
- Optimized dust, temperature and humidity controls for installed systems.
- Created detailed plans for system conversions and implementations to ensure smooth transitions.

Junior Developer, 04/2023 - 10/2023

HireCile – Bengaluru

- Built databases and table structures for web applications.
- Coordinated deployments of new software, feature updates and fixes.
- Conducted data modeling, performance and integration testing.
- Developed conversion and system implementation plans.
- Tested functional compliance of company products.
- Analyzed work to generate logic for new systems, procedures and tests.
- Inspected equipment, assessed functionality, and optimized controls.

Education

Master of Computer Applications: Computer And Information Sciences, Expected in 10/2027

Manipal University - Jaipur, India

- 8.2 first years GPA/CGPA

Bachelor of Computer Applications: Computer And Information Sciences, 08/2022

Sri Bhagawan Mahaveer Jain College - KGF

- Final Grade: 8.4

PUC: PCMB, 07/2018

Govt PU College - Sundarapalya Karnataka

- Final Grade: 54%

Certifications

Certified Java Full Stack Developer J-Spiders

Completed an intensive Java Full Stack Development program at J-Spiders, covering Core Java, object-oriented programming, JDBC, servlets, Spring Boot, RESTful APIs, front-end integration, database connectivity, and hands-on project development.

- Trained in end-to-end full stack application development using Java-based technologies
- Built practical skills in back-end logic, API design, and real-world project implementation
- Strengthened problem-solving and industry-oriented development practices through guided training

Computer Fundamentals & Programming Certificate Roman Institute

Completed a foundational computer education program at Roman Institute, covering essential computing concepts, programming basics, and office-oriented software skills.

- Studied fundamentals of computers, operating systems, and basic software applications
- Learned programming concepts in C and C++ with practical exercises
- Completed training in Tally and other computer applications for accounting and office use
- Built a strong base in logic building, typing, documentation, and general computer literacy
